

# Georgia Tech:

## Making Killer Robots

**W**hat could be worse than being vaporized without warning by an unseen drone whose pilot is thousands of miles away? How about by an autonomous computer-driven drone with no human being in the loop at all? Research on autonomous drones is moving fast - including right here in our back yard at Georgia Tech. Kevin Caron of the Drone Task Force reports on these developments, based on his well-received presentation at the recent School of Americas Watch.

**Tuesday, February 25, 2014**

**6:30 - Reception with light refreshments**

**7:00 - Program, followed by Q&A**

**Atlanta Friends Meeting House**
